EBSCOhost is a powerful online reference tool that offers a variety of full text databases and popular databases from leading information providers. In this tutorial, we will look at how to search EBSCOhost, as well as features including: the result list, previewing articles and images, and setting preferences.

Note that because EBSCOhost is a fully responsive web experience, you are able to access content from your mobile device with the same features and functionality available to you on desktop computers.

The Basic Search screen offers a simple, easy-to-use searching experience. The top tool bar offers additional features which can include a publication locator, subject browsing, and image collections. Note that the features available vary based on the databases selected.

You can add or change the databases being searched by clicking the **Choose Databases** link.

On the left side of the result list, you can limit your results to articles with Full Text or References Available or use the date slider bar to change the date range of your results. To view all of the available limiters, click the **Show More** link. When you click on a limiter, the result list is refreshed.

The image shows a search interface with a sidebar on the left containing a filter menu. The 'Subject' filter is expanded, showing a list of terms with checkboxes. A red box highlights the 'Subject: Thesaurus Term' dropdown at the top of the sidebar and the 'Show More' link below it. The main search results area displays a list of subject terms with their corresponding hit counts. A modal window is open in the center, titled 'Subject: Thesaurus Term', which allows for selecting multiple terms. The modal contains a table with columns for 'Name' and 'Hit Count'. The terms 'information technology' and 'information & communication technologies' are selected, indicated by checked checkboxes. At the bottom of the modal are 'Update' and 'Cancel' buttons. The background shows a search results page with video thumbnails and a list of subject terms.
