Access to electronic databases
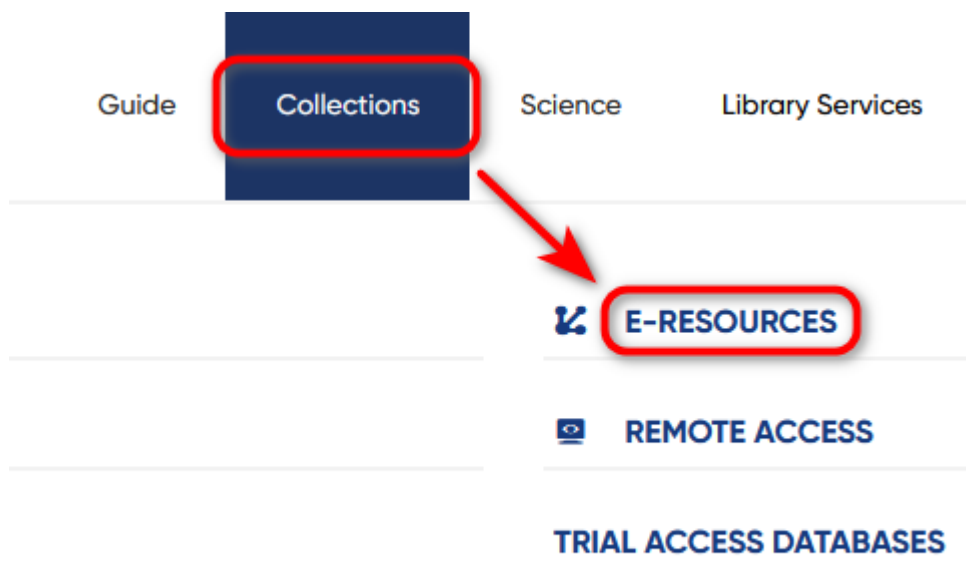

From March 2024 access to electronic databases subscribed by UKSW is carried out using the **Hidden Automation Navigator** (**HAN**) **system**. HAN is an automatic authentication system, working on a proxy basis, using the Microsoft365 UKSW login.

There is currently a transitional period in which remote access, as well as from the UKSW network, requires login via Microsoft365 UKSW. After the transition period, access from the University network will not require a login.

The current remote access platform, Pulpit UKSW, will be deactivated.

In order to use e-resources in this way, you need to:

1. Go to **biblioteka.uksw.edu.pl/en/**, choose **Collections,** and then **E-RESOURCES** tab.

2. Choose a database and click on its name.

|				
access, please contact us via the contact form				
HUMOR. International Journal of Humor Research	interdisciplinary	UKSW 100%	full-text	
Journal available at DeGruyter.				
IBUK Libra	interdisciplinary	UKSW 100%	full-text, bibliographic/ bibliographic and abstract	
JSTOR ("Arts & Sciences III" Collection) To obtain access data, please contact us via the online form.	science, art	UKSW 50%, MEiN 50%	full-text	
Legalis C. H. Beck	law	UKSW 100%	full-text	

In the new login window, enter your access data **including the domain** according to example: identifier**@domain – „identifier@uksw.edu.pl".**

ID examples:

Group of Users	ID format	Example
Employees	n.surname/name.surname	j.doe / john.doe
Students	###### (album, index number)	111111
Doctoral Students	D- ####	D-1111
Postgraduate Students	P- #####	P-11111

3. After correct authorization, the name of the University will be displayed, in most cases, in the upper part of the database page.

Not all databases show the name of the University after logging in.

The way of use of the **Legalis C.H. Beck** database is unchanged.

Logging in to the **HeinOnline** database takes place according to separate rules described on the page https://biblioteka.uksw.edu.pl/en/collections/e-resources/

To use the resources of the **Thesaurus Linguae Graecae** database, an individual account must be created.

→ TLG Access Guide (PDF)

If any problems occurs during HAN use, the databases JSTOR, Scopus/ScienceDirect, Springer, Web of Science and Wiley can be still accessed alternatively.
